- 2 **Supports 4 x 4 MIMO**
- 2 **Stable and improved signal transmission quality. Each Tx/Rx requires one core of fiber optic cable transmission, so 4T4X require four cores fiber optic cable.**
- 2 **Built-in 5G Dynamic TDD Sync Detection Module, automatic completion of 5G wireless network cell search and wireless signaling processing**
- 2 **One MU can support up to 8 RUs to maximize utilization of fiber optic cable, (A star topology is supported between MU and RU)**
