- Ø Two signal ports with full duplex design.
- Ø Linear power amplification to effectively suppress inter-modulation and spurious emission.
- Ø Adopting filter with highly selectivity and low insertion loss eliminates interference between uplink and downlink.
- Ø Stable and improved signal transmission quality.
- Ø Smart Automatic Level Control (ALC) ensures output level stable and adjustable continuously.
- Ø Auto Isolation check between service and donor antennas.
- Ø Smart mode to auto-adjust gain according to the isolation and signal level received by donor site.

² LCD????????????

² MGC ???????????

² AGC ?????????????

² ???

² **LCD display to show the instant gain and power and power**

² **MGC available for both uplink and downlink**

² **AGC to control output power at its maximum power level**

² **Low consumption**
