Ø LCD display to show the instant gain and power and power.

Ø Two signal ports with full duplex design.

Ø Linear power amplification to effectively suppress inter-modulation and spurious emission.

Ø Stable and improved signal transmission quality.

Ø Compact size with stable performance.

Ø Smart Automatic Level Control (ALC) ensures output level stable and adjustable continuously.

Ø Auto Isolation check between service and donor antennas.

Ø Smart mode to auto-adjust gain according to the isolation and signal level received by donor site.

∅ Auto shut off function available for both uplink and downlink.

∅ Cost-effective for practical solutions.
