Key features¹

- 2 Two signal ports with full duplex design.
- 2 LCD display to show the instant gain and power.
- 2 Linear power amplification to effectively suppress inter-modulation and spurious emission.
- 2 Stable and improved signal transmission quality.
- 2 Smart Automatic Level Control (ALC) ensures output level stable and adjustable continuously.
- 2 AGC to control output power at its maximum power level.
- 2 MGC available for both uplink and downlink.
- 2 Auto Isolation check between service and donor antennas.
