◦ Two signal ports with full duplex design.

◦ Linear power amplification to effectively suppress inter-modulation and spurious emission.

- Stable and improved signal transmission quality.
- Compact size with stable performance.
- Smart Automatic Level Control (ALC) ensures output level stable and adjustable continuously.
- Auto Isolation check between service and donor antennas.
- Smart mode to auto-adjust gain according to the isolation and signal level received by donor site.
- Auto shut off function available for both uplink and downlink.
- Cost-effective for practical solutions.
