

1800MHz + 2100MHz + 3500MHz Elevator Coverage Product

The full Netcom 4G+5G elevator coverage product supports FDD1.8G, FDD2.1G and TDD-NR 3500 mobile communication signal amplification, and consists of a host unit and an elevator unit; it is used to quickly solve closed blind areas or weak coverage areas with low business volume. System-level solutions for underground parking lots, elevators and other similar scenarios, thereby improving the deep coverage capabilities of 1.8G, 2.1G and TDD-NR 3500 wireless communication signals.
